Download the eBay Packages for the Websites you want to List

(the more you list, the more you make)

Log in to the Flippers Vault and Browse through the websites. One by one you will choose which ones you want to sell and then copy the eBay listing over to Turbo Lister. You will only do this ONE TIME for each website and then through Turbo Lister, you can easily relist the same websites over and over.

These eBay Packages are ZIP files.

Working with Zip Files (.zip)

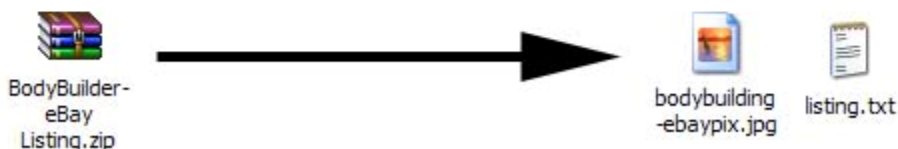

Zip files are used when you have several files you want to give someone all at once. For instance, on Flippers Vault, the eBay Package contains a text file that is the listing and an image that is used in the listing. So instead of having you download 2 separate files, one at a time, the 2 files are "zipped" together so you download just one file.

Once you download the zipped file, you have to "unzip" it so you will have access to all the separate files inside.

We take multiple files... and ZIP the up together to make one file

You take that one file... and UNZIP it to make the files separate

You will a program (software) that will Unzip files.

Here is a free one to use: [Download WinZip](#)

Copy the eBay Listing from Flippers Vault to Turbo Lister

1. Click on the button "Download eBay Package" (Shown in the image at Number 5)

[View a Video showing you how to do the above](#)

1. This will be one of two things: **A)** an image of the product that is for sale ON the website that you will sell. In other words, it is what YOUR CUSTOMER will be selling on their website once they buy it from you. OR **B)** this Number 1 item will be a screenshot of the website you will sell.
2. This is either the name of the product that sells on the website OR it is the name of the website itself.
3. Clicking this button will show you a demo of the website that you will sell on eBay
4. Clicking this button will download the website. You do not need to do this because after your customer pays you, you send them an email to download their new website directly from our server. However, there are 2 reasons you may want to download the website. **A)** You may want to read the product for yourself. Most of these products contain excellent information about online businesses, etc. or **B)** You may want to make changes to the website before you deliver it to your customer. Maybe you want to put one of your banners on it or remove information. In this case, after you make a sale, you will need to email the changed website to your customer and NOT give them the download link in the email we provide above.
5. Clicking this button will download the eBay Listing and Large Image so you can list this website for sale on eBay.
6. This is the pre-made email that you send your customers after they pay you. It contains the link for downloading their new website. It also gives them a link to sign up for free on the [Web Resource Database](#) <-- remember only Flippers Vault members can offer this in their eBay listings.

Domain Name Forwarding

If you want to add a domain name to sell with a website, all you need to do is use your Domain Name Registrars' Forwarding Feature and forward the domain name to the Forwarding URL given underneath each website on Flippers Vault:

The screenshot shows a product listing for "10 Dollar Profit Plans" with a site ID of 1. It includes three buttons: "View Website", "Download Website", and "Download Package". To the right is a text box for an email to the customer, containing a thank you message and a request to download the website. Below this is a "Domain Name Forwarding URL" field with the URL http://www.fybee.com/WebsitesProducts/10_Dollar_Profit_Plans/website and a red arrow pointing to it from the text "Forwarding URL". A note below the URL says "*Read the Getting Started Guide about 'Forwarding Domain Names'".

Site ID: 1

10 Dollar Profit Plans

Domain Name Transferring

If you include a domain name with the purchase of a website, you will need to transfer the domain name to the new owner.

Website Categories

Different types of websites are inside the vault and here are the categories and what they mean:

- **Product Websites**
The main thing on these websites that make money for the owner is a digital product that is downloadable after the sale. There may be Google AdSense ads or other features, but the product sold on the website is the main focus. The website owner keeps 100% of the money from the sales.
- **Premium Websites**
Fancy name for 'websites created by us'. Content is original and these sites were made from scratch. They are not template websites that are sold in batches and massive amounts all over the internet. Main source of income comes from features such as Google Ads, Amazon Products, ClickBank Products, etc.. There may be a digital product for sale on the website, but the aforementioned features are the main money-makers.
- **Directory Websites**
These websites are directories of different types of businesses. The main source of income is the Google AdSense Ads. These websites also have a way for the owner to make money by offering to upgrade the listings for the businesses who are already in the directory and by gaining new customers to the directory.
- **Mortgage Websites**
The mortgage websites were created by scratch. They contain different real-estate related features that make money because they are affiliate links through Commission Junction (cj.com)
- **Established Websites**
The established websites are websites that have been around for awhile. They began as templates or sites that were sold massively on the internet but some changes and additions may have been made to make them better.

Affiliate Program

Subscriptions to the Flippers Vault are sold through PayDotCom. Just sign up on PayDot.com for free and you will then be able to promote the Flippers Vault and earn 55% of all members payments each month. Please visit the following page for more information:

<http://www.flippersvault.com/affiliates>

There's even a way for you to customize an ebook I created with your affiliate link... you can give this ebook away free and you receive 55% of all subscription fees when people join the Flippers Vault through the links in your eBook.

Suggestions & Tips

- Don't rush out and buy 100 domain names. Try selling just some websites first because that will be almost pure profit. (minus your listing fee)
- Instead of having your buyer download the website they buy from us, YOU download the website and make some changes that will make YOU more money and then deliver the website to your buyer... for example, change the Google AdSense ID to yours, add a banner to it that goes to another website of yours, etc..
- You can also sell these websites on Craigslist, SitePoint.com and any other place you wish!
